

Composting: Easy as 1, 2, 3!

Step 2: Empty your indoor bucket into the outdoor cart

Q: How do I keep my compost bins fresh?

A: Here are some tips and tricks that you can use!

- Empty your indoor bucket frequently and rinse it each time. Every once in a while, wash it with soapy water, or using a dishwasher.
- Placing newspaper at the bottom of your outdoor cart can help to absorb moisture.
- Line both your indoor and/or outdoor bins with compostable liners. (not biodegradable).
- Bring your outdoor bin to the curb every collection day, even if it isn't full.
- Sprinkle baking soda over the compost if you find that it has become smelly
- Freeze meat scraps in a paper bag until collection day.
